CSS jonas

`<li>` default font-size is 16px

select and press `CTRL + /` to comment selected commands

difference between `id` and `class` attributes
id name used just once
classes we can use the name multiple times

in style.css
id use #
class use .

```
article p:first-child{
  color: red;
}
```
may be u have many paragraphs in your article but may be it's not the first child of the article may be it's a header so it may not work.
so pseudo perfect when the childe elements are the same like in `<li>` example

```
a {
  color: red;
}
```
for all links

```
a:link {
  color: #1098ad;
}
```
for anylink has href attribute

user agent stylesheet in browser inspect is the default style of elements

- note the elements that doesn't related to text doesn't inherited
